    <h2>📖 Abstract</h2>
    <p>This invention introduces the Dream Translate Contact Lens, an AI-powered smart contact lens that provides real-time language translation by overlaying translated speech and text directly into the user's field of vision. The system integrates:</p>
    <ul>
      <li>Augmented Reality (AR)</li>
      <li>Advanced speech recognition</li>
      <li>Optical Character Recognition (OCR)</li>
      <li>Built-in microphones and language database</li>
      <li>Voice feedback via connected earpiece</li>
    </ul>
    <p>It enables immersive multilingual experiences through real-time AR overlays, voice and text translations, and wireless communication support.</p>
